

Mobile Class A Processing Schwing Bioset

Alkaline Stabilization/Pasteurization

Fully Mobile Class A/AA Processing System

Let Revinu solve your disposal challenges with our mobile Class A/AA equipment and services.

Long Term Class A/AA Product Stability - Turnkey or à La Carte Options Available

- Eliminate Disposal Risks
- Completely Mobile
- Low Cost of Ownership
- Completely Enclosed to Eliminate Fugitive Dust and Odors
- Optional Operations
- Optional Hauling/Disposal
- Extremely Easy to Operate
- Modular Construction Allows for Easy Retrofits Into Existing Buildings

We Deliver!

Ready for Dispatch to Your Facility

Revinu has the capability to deliver equipment, set it up, and train your personnel on operations.

Equipment can be leased short term or long term, with or without operating personnel included. We can also arrange for hauling/disposal of the Class A/AA end product.

Biosolids Management

Revinu, Inc. has formed a specialized team to provide the best service possible for most biosolids management projects

We have successfully provided operations, including the distribution of millions of wet tons of Class A/AA material, Class B land application, dewatering, transportation and marketing services, to multiple municipalities. Our philosophy is to provide services that will not only benefit our communities but society as a whole.

Revinu, Inc. owns equipment utilizing the Schwing Bioset process to produce Class A/AA biosolids and offers mobile services for this technology. Additionally, Revinu, Inc. owns and operates equipment that dewateres liquid biosolids. This dewatered product can then either be further processed to a Class B or Class A/AA product, or be hauled away and safely distributed and re-purposed.

Revinu's approach is proven and successful as demonstrated by our history, which includes 25+ years of biosolids hauling and disposal, Class A/AA production, mobile dewatering, mobile Class A/AA operations, land management, soil enhancement, fertilizer sales, and equipment leasing.

Our team of experts is unique and it includes Beneficial Reuse Consultants, Product Managers, Project Managers, Permitting Specialists, Environmental Specialists, Mechanics, Haulers, and Operations Personnel.
